Notes

* CS 1301 replaces CS 1331 — your Degree Works audit requires CS 1301, 1315 or 1371 for Intro to Computing. Confirm with your advisor.

Shaded orange rows: verify credit hours in the GT catalog (BIOS 4460 and senior research BIOS 4590/4690 hours are estimates).

Bio electives: Depth = 12 hrs of BIOS 3000/4000-level (no research/teaching/internship). Breadth = 9 hrs of 3000+ BIOS, BMED, CHEM, EAS, MATH, NEUR, PHYS, PSYC, or LMC 4701/4702.

Many upper-level BIOS electives require BIOS 3450 — that's why it moved into Spring 2028.

Lab requirement (2 of 3) is met by BIOS 2601 + BIOS 2301; BIOS 3451 (Cell & Molecular Lab) is optional.

Still needed outside of courses: Georgia History and Georgia Constitution legislative requirements (AP credit only covered the U.S. portions) — ask the Registrar about the exam option.

Statistics: MATH 3215 needs MATH 2551 (Fall 2027). MATH 3215 -> 4261 -> 4262 is a sequence; all three are 3000+ MATH, so they also count as your 9 hrs of Breadth electives.

Econ: ECON 2105/2106 are already done. ECON 3110/3120/3161 + ECON 4xxx electives are the usual upper-level core. ECON 3161 (Econometrics) builds on your stats courses.

Double major vs. minor: this plan gives you roughly an Econ minor plus core courses. A full Econ double major likely needs more ECON hours — confirm the exact list with the Econ advisor before Fall 2028.

Free electives: ECON courses fill your remaining free-elective hours. Plan total is about 150 hrs (122 required), roughly 15-16 hrs/semester.
